Counting Butterflies

Six little butterflies happy to be alive,
One flew off, and then there were five.

Five little butterflies on flowers galore,
One flew off, and then there were four.

Four little butterflies among the sweet peas,
One flew off, and then there were three.

Three little butterflies with nothing to do,
One flew off, and then there were two.

Two little butterflies resting in the sun,
One flew off, and then there was one.

One little butterfly, now the only one,
She flew off, and then there was none.
